ABOUT ME

Computer Science graduate from Ramakrishna Mission Vivekananda College with hands-on experience building production-ready backend systems using Java and Spring Boot. Developed a full-stack E-Commerce platform featuring microservices architecture, OAuth2 login, JWT authentication, and Razorpay payment integration. Comfortable working across the stack — from REST API design and database optimization to React frontend collaboration. Looking for a Entry Level Backend/Software Developer role where I can ship real features from day one

EDUCATION

2023-2026

Bachelor of Science (Computer Science)

CGPA : 7.38/10

Ramakrishna Mission Vivekananda College

2021 - 2023

HSC

Kannada Sangha Higher Secondary School

2016 - 2021

SSLC

Kannada Sangha Higher Secondary School

PROJECTS

COLLEGE PORTAL

- Architected a role-based web application using Servlets, JSP, JDBC, and MySQL supporting 4 distinct user roles (Admin, Faculty, Student, HOD)
- Implemented session-based authentication and authorization, reducing unauthorized access risks by enforcing strict role boundaries
- Designed optimized CRUD operations with relational database schema, improving data retrieval efficiency by ~30%
- Enforced data consistency across 5+ relational tables using normalized database design

GitHub Link : <https://github.com/ImGowtham1205/College.git>

NOTES APPLICATION

- Built a secure, RESTful notes management system using Spring Boot and MySQL with full CRUD functionality
- Implemented stateless JWT authentication, eliminating session overhead and improving API scalability
- Secured user passwords using BCrypt hashing, ensuring zero plain-text credential storage

GitHub Link : <https://github.com/ImGowtham1205/Notes.git>

E-COMMERCE

- Engineered a scalable E-Commerce backend using Spring Boot MicroServices Architecture with API Gateway for centralized routing
- Secured REST APIs with JWT authentication and implemented OAuth2 social login (Google & Amazon) for seamless user onboarding
- Integrated Razorpay payment gateway handling end-to-end order and payment processing
- Implemented role-based access control for User and Admin workflows including product and order management
- Collaborated with frontend (React) to deliver seamless API integration across 10+ endpoints

FrontEnd : <https://github.com/ImGowtham1205/E-Commerce-Frontend.git>

BackEnd: <https://github.com/ImGowtham1205/E-commerce-backend-microservices.git>

HARD SKILLS

Languages: Java, C, C++, Python (Basic)

Backend: Spring Boot, Spring Security, Hibernate, JDBC, REST APIs, JWT, Microservices, WebFlux, Docker(Basic)

Databases: MySQL, MongoDB, SQL Queries

System Design: DNS, API Gateway, Load Balancing, Caching, Database Scaling, Message Queues, Monitoring & observability , API Monitoring

Testing: Junit , Mockito, API Testing(Postman)

Tools: Git, GitHub, MS Office

SOFT SKILLS

- Attention to Detail
- Team Work
- Problem Solving
- Accountability
